

# Electric Power Generation/Transmission

## Overview

---

Archer assists our energy and utility clients with devising and implementing strategies to navigate the ever-changing statutory and regulatory landscape. Our team members represent clients before state public utility commissions, energy offices, state siting boards, environmental agencies, and legislative bodies which impact or regulate the energy and utility industries.

We utilize an interdisciplinary approach and focus on practical, workable solutions that further our clients' business and operational objectives. We work with transmission and distribution utilities; regulated and non-regulated power generation companies; solar and wind project developers; large electricity consumers; private equity investors and funds; financial institutions; municipal systems; and others impacted by the wholesale and retail markets and applicable regulations.

### **We provide a wide range of services, including:**

- Regulatory and policy advocacy
- Rate case advice and filings
- Licensing or compliance applications
- Filing for contested regulatory matters
- Creating power purchase agreements and sales contracts
- Drafting financing agreements
- Mergers, acquisitions and joint ventures
- Representation in litigated proceedings and matters
- Regulatory compliance plan development
- Transmission and distribution matters
- Requests for proposals
- Linear development of critical infrastructure
- Contractual matters and disputes

- Mergers, acquisitions and joint ventures
