

Energy Transactions & Tax Credits

Overview

Successful transactions for the purchase of power or construction of generation require knowledge and experience in the commercial, financial, regulatory and environmental rules, regulations and practices driving energy markets. Archer's energy team provides comprehensive counsel on complex commercial transactions and handle transactions in all sectors of the energy industry. Combining business, regulatory, and transactional experience, we represent clients' interests in connection with the following:

- Mergers, acquisitions, sales and divestitures
- Strategic alliances and joint ventures
- Asset and debt portfolios
- Private equity and venture capital investments
- Trading and commodity agreements
- Project development and financings
- Power purchase and power sale agreements
- Real estate matters
- Procurement and construction contracts
- Interconnection agreements
- Antitrust and competition laws
- General corporate, commercial and contract matters
- Intellectual property and data security
